

J785 Barcode Scanner Programming Service by Replacement Instructions

Applies to: SendSuite[®] Tracking, SendSuite[®] Arrival, SendSuite[®] Shipping, SendSuite[®] Xpress, SendSuite Live[™], Ascent[™]

Purpose

This document provides instructions for programming a cordless barcode scanner to append Tab or Carriage Return characters to the transmitted barcode in SendSuite Tracking, SendSuite Arrival, SendSuite Shipping, SendSuite Xpress, SendSuite Live and Ascent.

Description

In order to automatically advance fields in SendSuite Tracking and SendSuite Arrival, a Tab character must be sent at the end of the transmission. In order for SendSuite Shipping, SendSuite Xpress, SendSuite Live and Ascent to automatically retrieve customer or shipment data, a Carriage Return character must be sent at the end of the transmission.

Action

Locate the applicable product on the following pages and scan the associated 2-dimensional barcode.
